

SKILLESTAD & TASSLE SIMMENTAL REDS & BLACKS

**February 11, 2010
1:00 P.M. MST**

**Glendive Livestock Exchange
Glendive, Montana**

Selling 140 Bulls

- ... Polled
- ... Solid Black & Solid Red
- ... Purebred
- ... Simmental/Angus Hybrids
- ... Angus

**Two Great Programs
One Great Sale**

As most of you have probably heard we had our female dispersion sale last fall and this will be our last joint production sale. We all have full time jobs outside of the ranch and it was decided that this was best for us as a family. Jim was just elected to his second term as Dawson County Commissioner and he would like to retire upon completion of his term. Patrick is an engineer with Williston Basin Pipeline and he would like to pursue other interests outside of the ranch. Mike is a manager for the MT Department of Transportation but he is going to continue to stay involved with Simmental cattle but on a much more manageable scale.

With this being our last joint production sale, we want to let everyone know that all bulls will be guaranteed just like in the past. We currently have both yearling and two year old bulls at the ranch in case something should happen to your bull or if you just decide you need another bull later. As mentioned above, Mike will continue to stay involved with the Simmental cattle. Bob Skillestad and Jared Edwards purchased several cows at our dispersion sale and starting in 2011 Mike, Bob, and Jared will be selling purebred and Sim/Angus bulls each year via private treaty.

It has been extremely exciting and rewarding to watch our program develop throughout the years. I don't think we ever imagined when we started selling yellow and brown banded Simmental at home for \$800 to neighbors and friends, that we would sell a \$20,000 solid black Simmental, put numerous bulls into to various stud programs, and sell Simmental cattle all over the US and Canada. A lot has changed in the Simmental breed and it has been a great ride to be on.

In closing, we would like to extend a heartfelt THANK YOU to all of our customers. None of this would have been possible without your loyal and dedicated business. We would also like to thank the Lassle's for the many enjoyable years we have had together. We wish them the best of luck as they push forward and we are confident that the future of the Simmental breed is in good hands. We will truly miss the friendships that we have gained throughout the years. We hope you enjoy this stout set of bulls.....**"Breed em all Simmental!"**

Sincerely,
Jim and Pat Skillestad
Mike, Jill, Whitney and Ashley Skillestad
Patrick, Melissa, Averie, and Brecken Skillestad

Patrick, Melissa, Pat, Whitney, Jim, Ashley, Mike Jill
Brecken & Averie

.....
Welcome to the 17th annual and final joint Skillestad and Lassle Production Sale. The writing of this letter comes with much sadness, as this will be the last sale we will be holding with our long time partners the Skillestad family. Over the years we have enjoyed a friendship and partnership that has allowed us to offer some of the best Simmental genetics you will find anywhere. We wish the entire Skillestad family the best of luck in their future endeavors. While we are sad to lose such wonderful partners, we wish to remind everyone that the Lassles will continue to be your source for Simmental and SimAngus genetics in the future. Through the extensive use of AI and embryo transfer we are working diligently to ensure that we will be your Simmental Seedstock producer of choice for many years to come.

The beef industry has certainly seen its fair share of challenges the past year. When prices are low and inputs are high, it is logical to tighten the belt and cut back on unnecessary expenses. One place you may be tempted to cut back, but where you can't afford to is on new genetics for your herd. In the short term, cutting back in this area may have a positive impact on your balance sheet, but can have a negative impact for years to come. Remember that the genetics you purchase today are your future feeder calves and replacement heifers.

We realize and appreciate the faith that our customers place on our breeding program. You are putting trust in our herd health and bio-security programs. Because of this we again tested all the bulls in the sale for BVD-PI and all bulls were certified negative as carriers of BVD. **Also, any bull with parentage that indicates he has a chance of being a carrier for any known genetic defects as of the time of the sale has been tested and are guaranteed genetic defect free.**

Once again, the bulls will be fed until April, fertility tested, and delivered to your ranch. Let us know if you have any problems with your purchase and we will do our best to correct them. We appreciate the opportunity to be your source for Simmental and SimAngus genetics.

We would like to take a moment to thank our loyal customers, many of whom over the years have become great friends. Your continued support of our program is what drives us to continually improve our herd and bring you a strong set of bulls every year. We hope that you continue to join us the second Thursday in February for many years to come.

Clay's Cell – 406-939-1348 • Jim's Cell – 406-939-2470

We will have carcass ultrasound data available sale day – also will be on the websites when we get the results.

View the catalog in color: www.lassleranchsimmentals.com or www.skillestadranchsimmental.com

We will keep the websites updated with any information we get between the time the catalog goes to print and sale day.

Cattle are available for your inspection any time. Feel free to come ahead of sale day.

Announcements: All announcements and changes made by the auctioneer will take precedence over printed material. Anyone attending the sale attends at their own risk. Lassle Simmentals, Skillestad Simmentals or any of the sale force will not be responsible for any personal injury or loss for attending the sale.

Sight Unseen purchases: We guarantee all sight unseen purchases. Call ahead of time and we will go over the offering. You can leave a bid with us or a representative. You will be treated as if you are here. A video of sale cattle is available on www.lassleranchsimmentals.com.

We will offer Free Delivery within a 300 mile radius of Glendive, MT. Other delivery arrangements will be made as economically as possible, based upon the volume of the purchase.

\$100.00 off cattle that are taken sale day. Free feed on any bull over \$1500, until the first of April. On the bulls that we winter, we will have them fertility tested and fertility certificates issued.

Insurance will be available sale day – we encourage you to insure bulls that we winter.

Retained Semen Interest

The bull buyer will receive full possession, 100% salvage value, and 2/3 interest of any bull purchased in this sale while Lassle Ranch & Skillestad Ranch Simmentals will retain 1/3 semen interest in these bulls. This semen interest is a royalty interest that entitles LRS & SRS to 1/3 of the revenues of any semen sold. LRS & SRS retained semen interest remains even if the bull or any interest in the bull is sold to a third party. It is the buyer's responsibility to ensure that LRS & SRS's interest is upheld if semen is ever sold. The buyer must also inform any third party of LRS & SRS's interest if the bull is ever sold. Lassles & Skillestads will not be responsible for expense related to semen collection or promotion of any bull purchased, unless a mutual agreement is reached for these expensed prior to semen collection. LRS & SRS's retained semen interest also includes the right to collect semen on the bull at our expense and the buyer's convenience.

Terms and Conditions:

1. Terms of the sale are cash or check at the time of sale unless other arrangements are made prior to the sale.
2. All bulls are guaranteed breeders. Purchaser shall let seller know within 10 months of purchase date if bull is unsatisfactory. Bulls will be returned to ranch at buyer's expense. Seller has the right to semen check the bull if found unsatisfactory. Seller will replace the bull with a bull of equal value agreed on by both parties or return purchase price. In no instance shall seller be responsible for more than the purchase price.
3. Each animal becomes the property of and therefore is also the risk of the purchaser as soon as it is sold: except it shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of twenty-four (24) hours after the sale, whichever occurs first. We guarantee the cattle to be healthy sale day.
4. We will abide by the rules set forth by the American Simmental Association
5. As we have no control over the acts of God, we can not guarantee these cattle against death loss, injury or sickness. We guarantee cattle to be healthy sale day.

Testicle Measurements:

The scrotal circumference of each bull was tape-measured on January 1, 2010. The scrotal measurements were adjusted to yearling, and sometimes will vary one way or another as actual yearlings. We guarantee our bulls 100% for fertility – Unless damage is induced at your ranch – and then it's out of our control.

Recommendations for Scrotal Circumference

Months of Age	12 – 14	15-20	21-30	30+
Scrotal cm	35	37	39	40 – Excellent
	30-35	31-37	32-39	33-40 – Good
	30	31	32	33 – Poor

Suggested Guidelines for using Yearling Bulls:

We are firm believers in the use of yearling bulls and feel it is one of the best years of their lives. It is a time when they are easy to manage and their only concern is breeding cows. We have found that yearling bulls that are managed carefully during the second year of their lives, not only do well, but they will perform better, over time. Below are some suggested guidelines for the care of yearling bulls.

- Upon delivery to your ranch, keep yearling bulls separate from older bulls and feed them a maintenance ration of 5-8 lbs per head of grain and free choice hay. Reduce the amount of grain fed gradually, so that bulls are on straight hay or grass 2-4 weeks prior to the breeding season.
- Where possible, try to limit the bulls to 45-60 days of pasture service the first year. At this time or as soon as possible remove the bulls and put them in separate pastures with plenty of good quality grass.
- It is best to feed yearling bulls separate from older bulls until after their second breeding season. This allows them to achieve the growth and strength to compete with older bulls for feed and space.
- You will see the benefit of a little added cost and care of feeding a yearling bull by probably two or three more years of service from a well managed and healthy bull.

Bull Buyer's Guide to American Simmental Association's EPDs and \$ Indexes

EPDs are based upon a deviation from the breed average (above or below) for the base year for the particular trait. You cannot compare EPDs from one breed to another. EPDs may change from the time this catalog is printed until registration papers are transferred.

CE	Calving Ease	% of unassisted births from two-year old heifers
BW	Birth Weight	Lbs of birth weight. The lower the number, the lighter the bull's calves will be
WW	Weaning Weight	Lbs of weaning weight. The higher number more lbs weaned
YW	Yearling Weight	Lbs of Yearling weight. The higher number more lbs at yearling
MCE	Maternal CE	Predicts calving ease of bull's daughters. Higher is better
Milk	Maternal Milk	Lbs of weaning weight due to dam's milk
MWW	Maternal WW	Lbs of weaning weight due to dam's milk and growth
CW	Carcass Weight	lbs. estimates the average difference in carcass weight
BF	Back Fat	Inches of fat thickness
REA	Ribeye Area	Square inches of ribeye
Marb	Intramuscular Fat	% of marbling score or %IMF
YG	Yield Grade	Tenths of a yield grade
API	All Purpose Index	\$ per cow exposed under an all-purpose -sire scenario
TI	Terminal Index	\$ per cow exposed under a terminal -sire scenario
Stay		Probability that daughters entering the herd will stay in production through 6 years of age.

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in - blending EPDs and economics to estimate an animal's overall impact on your bottom line.

All-Purpose Index API: Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained, & the remaining heifers & steers put on feed & sold grade and yield.

Terminal Index IT: Evaluates sires for use on mature Angus cows with all offspring on feed and sold grade & yield.

Using API and TI: First determine which index to use, if you're keeping replacements use API, if not, TI. Then just as with EPDs zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed). The difference can be used to determine how much a bull is worth compared to another. Or put another way how much you can pay for one bull compared to another. For example, when buying an all-purpose type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 difference x 30 Head x 4 yr.= \$6000).

SRS Land Rover L1007 • SRS Fortune 500

This bull has an excellent pedigree going back to Land Rover and Fortune 500. This is the deepest and thickest bull we have ever raised. Phenotypically you won't find better. This bull on pasture looks like he's been in a feedlot all year long. He is a calving ease bull with excellent carcass traits. We had some beautiful daughters out of him and they sold well at our dispersion sale. We showed this bull at our dispersion sale and everyone that saw him was in awe over the way this bull was built.

Maternal Sires
Skillestads Mr Mick Max • Stoughs Coal Train

We had a number of top Preferred Beef sons the year we kept this bull. We decided to keep this bull back in our program because of his length and thickness. His mother has been excellent. His numbers have no weaknesses. This bull will produce calves that will pay dividends both maternally and with performance.

We sold this Land Rover son at our sale last year for \$6500 to a purebred Angus breeder in Idaho. Unfortunately at delivery time he got injured and therefore we couldn't ship him to Idaho. He healed completely so we decided to use him because of his pedigree and solid numbers. This bull has length and thickness and will make an excellent herd sire that will fit any program.

44W is a wide based, thick made son of Master Design out of a hard working Big Country cow. We had to sell his dam in July because she got a lump and his 635 lb weaning weight reflects that. This dam has consistently weaned heavy calves and ended up with a weaning weight ration of 104 on 4 calves.

Lot 62 is a thick made attractive In Dew Time son out of a very consistent flush that also produced our top selling bull in 2009, LRS Big Country Time. You should see his three full sisters in our replacement pen and another was sold to Ratcliff Ranch in Oklahoma. He should sire some great moderate easy keeping daughters. 79W tested homozygous black and heterozygous polled. Littermate to lot 49.
